

EVAPORATED, CONDENSED AND DRY MILK

REPORT FOR JUNE 1965

July 30, 1965

PRODUCTION

EVAPORATED AND CONDENSED MILK: Output of evaporated whole milk in June was 181 million pounds, according to the Crop Reporting Board. June production was 11 percent less than a year earlier and 24 percent under the 1959-63 average for the month. Total production in the first half of 1965, at 890 million pounds, was 12 percent less than in the comparable period of 1964.

Production of canned sweetened condensed whole milk during June, at 5.4 million pounds, was off 26 percent from a year earlier and 17 percent below average. However, first-half year production, at 47 million pounds, was 2 percent above the January-June output last year.

^{1/} Revised.

NOTE: Attention is called to the revisions in production estimates of dry, condensed and evaporated milk for 1965 and the enumerations for 1964 as shown on pages 9 to 11. Revised prices paid for milk used in the production of evaporated or canned condensed milk for 1964 will be published in a later issue.

1/ Revised.

DRY MILK: Nonfat dry milk production, spray and roller process combined, for June is estimated at 225 million pounds by the Crop Reporting Board. Output was 6 percent below the same month last year but unchanged from the 1959-63 average for June. January through June production totaled 1.3 billion pounds -- 2 percent below a year earlier.

Spray-dried nonfat milk output, at 215 million pounds, was 6 percent below June 1964 but 3 percent above average. First 6-months production totaled 1.2 billion pounds, 1 percent below the same period a year ago.

Roller-dried nonfat milk is estimated at 9.9 million pounds -- 17 percent under a year earlier, 42 percent less than average and the smallest production for June of record. January through June production, at 44 million pounds, was 22 percent less than in the comparable period last year.

Dry whole milk output, at 7.7 million pounds, increased 15 percent from June a year ago but was 6 percent below average. Output in the first 6 months of 1965 was 48 million pounds, 11 percent above the corresponding period of 1964.

Dry buttermilk production, at 8.4 million pounds, was down 12 percent from June 1964 and 7 percent below average. During the first half of 1965, production totaled 47 million pounds, 13 percent less than the first 6 months last year.

Dry skim milk for animal feed output in June was 2.2 million pounds -- 12 percent more than a year earlier but 19 percent less than average. The January through June total of 11.6 million pounds was up 8 percent from the same period a year ago.

STOCKS, SHIPMENTS, PURCHASES, AND PRICES

EVAPORATED AND CONDENSED MILK: Stocks of evaporated whole milk held by reporting manufacturers on June 30 totaled 199 million pounds -- 4 percent below a year earlier and 22 percent less than the 1959-63 average for the date. Holdings of canned sweetened condensed whole milk, at 7.9 million pounds, were off 18 percent from June 30 a year ago but were 26 percent more than average.

Prices paid by condenseries to producers during June averaged \$3.24 per hundredweight for milk having an average milkfat content of 3.76 percent. This is equivalent to 86 cents per pound of milkfat -- 1 cent below the previous month but 1 cent more than a year earlier. By States, the highest average price -- 95 cents per pound -- was paid in California, while the lowest average -- 81 cents -- was paid in Virginia, Kentucky, and Tennessee.

During June, reporting condenseries for which historical data are available purchased 433 million pounds of whole milk from about 54,000 producers. Average daily purchases per producer of 265 pounds compared with 255 pounds a year earlier and 226 pounds, the 1959-63 average for the month.

Selling prices for evaporated whole milk in June, as reported by manufacturers, averaged \$6.07 per case of forty-eight 14½-oz. cans. This is unchanged from May but 14 cents more than the same month last year. All regions were unchanged from May except the Southwestern, which was down 1 cent.

DRY MILK: Manufacturers' stocks of nonfat dry milk on June 30 totaled 155 million pounds -- 20 percent above the same date a year ago but 3 percent below the June 30, 1959-63 average. Spray-dried holdings at 148 million pounds were 23 percent more than a year earlier and 2 percent above average. Roller-dried stocks totaled 7 million pounds -- down 19 percent from June 30, 1964, 51 percent below average and the lowest of record for the date. Dry whole milk inventories, at 8 million pounds, were up 22 percent from a year earlier -- 7 percent above average and the highest for the date since 1960.

Stocks of dry buttermilk at 9 million pounds were 4 percent below both a year earlier and average. The inventory of dry skim milk for animal feed was 1.8 million pounds, up 35 percent from June 30 a year ago and up 24 percent from average.

June shipments of total nonfat dry milk, at 193 million pounds, were 12 percent more than the month before, but 6 percent less than the record breaking movement of June 1964. Spray-dried nonfat shipments, at 187 million pounds, were up 11 percent from May but down 5 percent from June a year ago. Roller process nonfat movement totaled 6 million pounds -- a 39 percent gain from May but a loss of 16 percent from a year earlier and a record low for June. Dry whole milk shipments in all container sizes during June, at 7 million pounds, were off 21 percent from the month before but up 16 percent from a year earlier and the largest for the month since 1957. Dry buttermilk movements totaled 6 million pounds, up 17 percent from May but down 5 percent from June a year ago.

Selling prices during June for spray and roller process (combined) nonfat dry milk as reported by manufacturers averaged 14.54 cents per pound. This compares

with the May price of 14.53 and the June 1964 price of 14.60. Spray process prices at 14.55 cents were fractionally above May but nominally below a year earlier. Roller-dried product averaged 14.15 cents per pound, about 0.1 cent below May but 0.2 cent above June last year. Dry whole milk prices, at 33.32 cents per pound, compared with 33.91 in May and 32.33 cents a year earlier.

Nonfat dry milk deliveries to the United States Department of Agriculture during June totaled 102.8 million pounds. During the period April 1 through June 30, 1965 deliveries were 299.1 million pounds or 13 percent smaller than the 215.1 million pounds for the comparable period a year ago. On July 16, 1965, the Department held 220.0 million pounds of uncommitted supplies of nonfat dry milk. These holdings include 30.5 million pounds of vitamin fortified nonfat dry milk in all packages and container sizes, 21.1 million pounds of non-fortified in $4\frac{1}{2}$ -pound and 50-pound bags and 168.4 million pounds of non-fortified in 100-pound bags.

Payment-in-kind export certificates issued for nonfat dry milk in June covered 18.8 million pounds. For the 3-month period April 1 through June 30, 1965, PIK certificates totaled 41.0 million pounds, compared with 146.0 million for the corresponding period last year.

Table 12.-Milk bought by condenseries: Quantity bought, and number of producers, June 1965 1/

Item	Average June 1959-63	June 1964 <u>2/</u>	June 1965
Milk bought from producers..... pounds	588,665,000	458,661,000	432,589,000
Producers..... number	87,000	60,000	54,000
Average per producer per day... pounds	225.5	255.1	265.3
Change in purchases per producer:			
1965 from 1964..... percent	xxxx	xxxx	+ 4.0
1965 from 5-year average..... percent	xxxx	xxxx	+17.6

1/ Reported milk purchases at those plants (or their receiving stations) with canning equipment for which historical data are available. In some periods a part or all of the milk received at such plants may be used for purposes other than the manufacture of canned milk.

2/ Revised.
